## 2016 KU Anatomy Forum

The 14<sup>th</sup> AONE PLASTIC &  
AESTHETIC SURGERY SYMPOSIUM

*Greetings,*

It's amazing how quickly time flies seeing that the unbearable hot summer has passed and the year is coming to an end. We will be hosting this year's 2016 KU Anatomy Forum's 14<sup>th</sup> Aone Plastic & Aesthetic Surgery Symposium.

4 years has already passed since the Practical Anatomy Research Institute was established in 2013. A strong promise and cooperation and hard work from Aone Plastic & Aesthetic Surgery Symposium resulted in a higher quality and quantity of Cosmetic Surgery Symposium which started the "Practical Anatomy Forum".

Korea University's Practical Anatomy Research Institute Education in Anatomy did clinical trials using cadaver and accomplishing our goals in improving people's lives and we continue to support this cause.

Practical Anatomy Forum is pushing towards a creative unification with basic medical and clinical science.

Due to the very fast development of scientific skills in medical science and medical treatment we predict that a new paradigm will be set.

We sincerely hope that everyone who will be attending this Symposium not only focuses on the clinical skills but expands their mind to a new medical science future.

I would like to thank the invited speakers, all participants, and everyone who helped making this forum possible.

I am proud and can say that Aone Plastic & Aesthetic Surgery and Practical Anatomy Research Institute has already started on the path to a bright future and wish all attendees have joy and happiness in the days to come.

Head of the Practical Anatomy Research Institute    **Chang-Sub Uhm**
